# Introduction

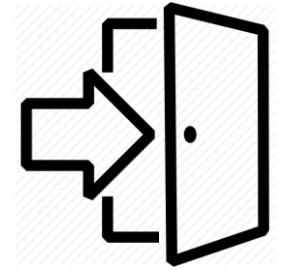

- The European BIC Network and the ESA Space Solutions Network 1st joint webinar
- Focus on available opportunities for European business working on Space applications
- In conversation with:

# Introduction

An entry point to **space knowhow** and **assets**

- **Astropreneurs** - a coaching programme for startups 'touching' space technology (Carlos)
- **Copernicus Incubation** - support startups that use remote sensing data - extra tool for incubation centers (Sam)

# Let's start!

Q.1 Does start ups include research organisations? (public entity)

Q.2 Is this topic related to ESA emits projects submissions?

Q.3 I think most of the innovative technologies today can be used in space exploration for example sensor to detect the quality of soil, do you consider such startup as space startup?

Q.4 Dear Carlos, Dear Sam, I would like to have more information about the profiles of the mentors you are looking for. Are they more technical or business developer profiles ? Many thanks

Q.5 We are from Cyprus Europe can we apply for any star up funding since we are not ESA members ?

Q.6 How do you find the funding opportunities and how much time usually do European funding schemes take before the fund is available?

Q.7 What if country is not EU, but in the accession process like Serbia?

Q.8 What is Equity Free?

Q.9 Which one is more preferable for these funds, Software or Hardware?

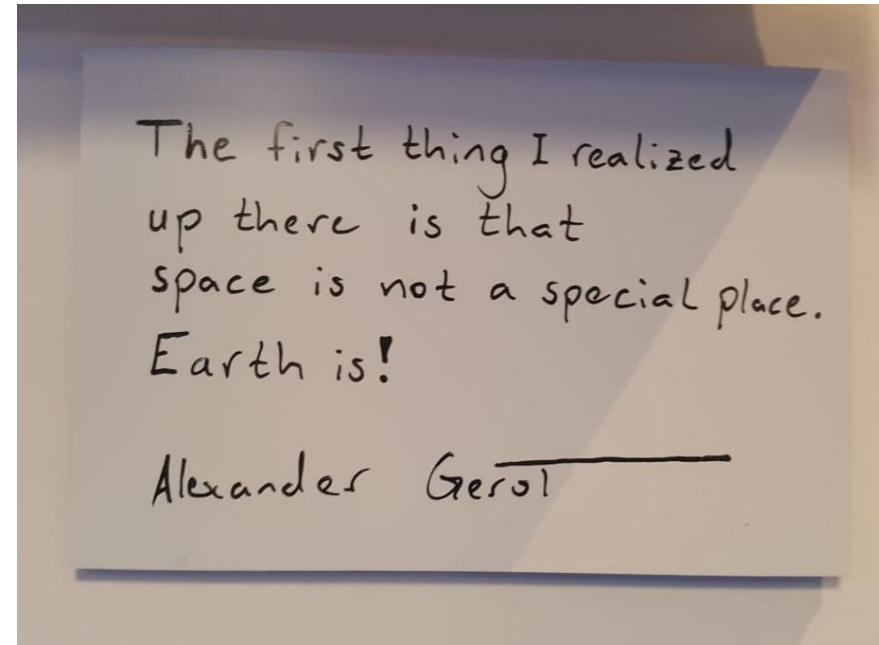

Q.10 Is Structural Health Monitoring for infrastructures applicable in this 50K funds?

Q.11 Can any startup join the incubator or only those who would utilize the Copernicus data are eligible?

Q.12 Copernicus Incubation: Is ESA BIC co-funding eligible (for mentioned 15%)?

Q.13 Hi, do know need some previous engineer / o similar knowledge to understand copernicus data? Alex from Italy

# Conclusions

Alexander Gerst
